RUBY DEVELOPER

Profile

Software developer with 4 years of professional experience. Self-organized remote worker. Open Source contributor. Constant learner.

Experience

Freelance (Upwork)

Ruby Developer (remote)

October 2016 - present

I've completed few successful contracts on the platform during last months, got a positive feedback from 100% clients and received a "Top Rated" status. My biggest project on Upwork at the moment is an Airbnb-like app for connecting guides and travelers from different countries, with payments and maps integrations. I was a solo developer on the project, responsible for both frontend and backend, and configuring things like CI and deployment.

Team size: solo developer

Core technologies: Ruby on Rails, PostgreSQL, Stripe API, Google Maps API

Wealthica Financial Technology Inc.

Node.js Developer (remote)

September 2015 - October 2016

I temporarily switched to Node.js while working on this project. I was one of backend developers, primarily focused on Node.js backend and building PhantomJS scrapers for simulating user interaction with Canadian banks.

Team size: 4 people

Core technologies: Node.js, MongoDB, PhantomJS (scraping), Backbone.js / Marionette.js

MTW Media Inc.

Ruby Developer (remote)

February 2015 - October 2016

I was responsible for building backend for blogging platform which eventually pivoted into customer support service.

Team size: 2 people

Core technologies: Ruby on Rails, PostgreSQL, AngularJS

Flatstack

Ruby Developer

September 2012 - February 2015

I've been working on projects of different size and complexity during my career at Flatstack, from small CRUD apps to large enterprise solutions consisted of multiple Rails apps and complex business logic. Most of my tasks were backend-related, though I did some frontend work with Backbone and plain JS sometimes.

Team sizes: 2-10 people

Core technologies: Ruby on Rails, PostgreSQL, Backbone.js

KineticMax

Web Developer

February 2012 - June 2012

I was responsible for HTML/CSS work on few websites for local companies.

Team size: 3 people

Core technologies: Python, HTML, CSS

Education

Kazan State University

Computer Science

2011-2014
